

JDW, JL: Saturday night's TV news had an item in which EMK is again quoted as calling for a JFK re-investigation if "new evidence" justifies it. You may see correlations, which are possible. I think probable. However, the WxPost carried no such item. So, if you have it from any source, I would appreciate a copy for my files. This is the second time I recall. Both times I caught the electronic reporting but I recall nothing in the printed press. The first was in a statement when he was in Mass....This and its potential are merely one of the reasons I'm so uptight about what I've called the whoring around by those I've called self-promoters. All aspects of the situation are and I think will be delicate. HW 5/12/75
